## PERSONAL PROJECTS

### Random-Quotes-Generator

- This project aims to enhance my proficiency in front-end development technologies such as HTML, CSS, and JavaScript, as well as my skills in integrating with external APIs. Additionally, it serves as a demonstration of my ability to design and implement interactive and engaging user experiences on the web.

### E-Commerce

- Create a comprehensive e-commerce website using Django framework, focusing on delivering a seamless shopping experience for users. This project aims to showcase my proficiency in back-end development with Django, including user authentication, product management, shopping cart functionality, payment integration, and order processing.

### Registration Form

- This project aims to showcase my proficiency in front-end development technologies like HTML, CSS, and JavaScript, as well as back-end technologies such as Node.js for form validation and data processing. It serves as a demonstration of my ability to create intuitive user interfaces, handle user input securely, and manage data effectively for various registration purposes.

## SKILLS

Core Java

SQL

Oracel

HTML5/CSS

Java Script

Bootstrap

Python

Django

## ACHIEVEMENTS

### Coding Challenges

Completed over 100 coding challenges on HackerRank, showcasing proficiency in algorithms and data structures.

## CERTIFICATES

Full Stack Web Development Certificate from Tap Academy(Offline) (03/2024 - Present)

6 months Course in Full Stack Development
